

## Beauty News & Updates

AQUA DETOX™ USA

February 1, 2007

*For immediate release:*

Chandler, Ariz. – *Images at San Marcos Salon & Day Spa* in Downtown Chandler is introducing Aqua Detox USA.

The Aqua Detox foot spa treatment is a new and revolutionary way to detoxify and re-balance your body through the feet. The feet are ideally suited to detoxifying from - each foot contains around 2000 pores. An electrical Array is placed in the center of a footbath filled with water along with a little salt to aid the conductivity of the water. The Array produces an electrical frequency that resonates through the body thus stimulating and rebalancing all cells. This allows improved nutritional absorption and toxic release from each cell. The Aqua Detox treatment stimulates the natural bodily function of excretion, so supports the removal of toxins and other impurities which for whatever reason, the body's cells have allowed to build up. The Aqua Detox treatment may remove impurities thoroughly as it also energizes cells and limits free radicals.

*Quote: From Jere Pastore, owner*

Although *Images at San Marcos Salon and Day Spa* makes no claims to cure medical conditions, "The evidence of medical research is amazing, say's Jere, owner of Images at San Marcos Salon and Day Spa. We can't avoid pollutants and toxins in one form or another these days and most of us lead busy and stressful lives. So the opportunity of being able to relax and enjoy a half hour of 'time-out', plus being able to detoxify without dieting, sweating or strange drinks, is very attractive. We are the first full service Salon and Day Spa in the East Valley to offer the Original Aqua Detox USA Foot Spa Treatment. To achieve the maximum benefit from the Aqua Detox, six treatments are recommended during the initial month, followed by a minimum of one per month thereafter".
